

Evaluation of cooperation group 43

With regards to working together as a team on assignment NLP-A2, the collaboration was great overall. Our intention was to take the group contract as seriously as reasonably possible and decided to share our strengths and weaknesses. However we think it was not the mere sharing of strengths and weaknesses and amending to the group contract that made our cooperation successful but the good natured, respectful and frequent communication and thoughtful handling of challenges that arose. With a little help of the TAs in Yee Man's group, we managed to successfully complete the assignment in a way that was both cooperatively pleasant and temporally satisfactory.
